FURBABIES

TAKING CARE OF YOUR FUR BABY...NATURALLY

INTRODUCTION

At FURBABIES, everything begins with love.

This collection was created to share more than products — it shares a philosophy. A belief that our pets, including horses, deserve thoughtful, natural support throughout every stage of their lives. They are family. They trust us completely. And that trust deserves care without compromise.

FURBABIES was built on the idea that functional wellness can be both effective and natural. Our formulations thoughtfully combine functional mushrooms, adaptogenic herbs, and plant-based cannabimimetic compounds — carefully selected to help support comfort, calm behavior, mobility, and overall vitality.

Crafted in Canada using non-GMO, human-grade food ingredients, each product reflects our commitment to quality, safety, and transparency. We hold ourselves to standards comparable to those used in human-grade food production, because what we give our animals matters.

But this book is not only about formulations and ingredients. It is about stories.

Within these pages, you will find the experiences of devoted pet parents who have witnessed meaningful changes in their animals' lives — from renewed energy in aging companions to calmer days for anxious pets. These testimonials are the heart of FURBABIES. They remind us why we began and why we continue to innovate.

We call this collection **Pawsitively Real Stories** — because real wellness is measured not only in ingredients, but in wagging tails, steady strides, peaceful rest, and the quiet comfort of knowing you are doing your best for those who depend on you.

Thank you for being part of this journey.

1.

CORDYCEPS - FUNCTIONAL MUSHROOM

Doug, a 5 year old pit loved a good walk with mom and dad, and hiking with the family was the core of his existence. A painful ACL tear took its toll and the days of having outdoor quality family time was put on hold. As the tear was healing, Doug was started on Cordyceps mushroom powder, which helped speed his recovery and helped to restore his energy. Now, the hikes are back on in record time and everyone is happy.

Cordyceps mushrooms are a unique type of fungi known for their health benefits. While research is ongoing and more studies are needed to fully understand their effects, here are some of the potential benefits attributed to cordyceps mushrooms:

1. **Boosting Immunity****: Cordyceps mushrooms have been shown in some studies to enhance the immune system's response to infections and illnesses, possibly due to their immunomodulatory properties.
2. **Increased Energy and Endurance****: Traditionally used in Chinese medicine to improve energy levels and physical performance, cordyceps mushrooms are believed to enhance oxygen utilization, which may lead to increased stamina and endurance.
3. **Supporting Respiratory Health****: Cordyceps have been used historically to support respiratory health and may help in managing conditions such as asthma, chronic bronchitis, and other respiratory issues.
4. **Antioxidant Properties****: Cordyceps mushrooms contain various antioxidants, such as polysaccharides and nucleosides, which may help protect cells from oxidative damage caused by free radicals.
5. **Potential Anti-inflammatory Effects****: Some studies suggest that cordyceps mushrooms possess anti-inflammatory properties, which could be beneficial in managing inflammatory conditions and reducing the risk of chronic diseases associated with inflammation.
6. **Supporting Kidney Health****: In traditional Chinese medicine, cordyceps are believed to benefit kidney function and may help in managing kidney-related conditions such as kidney disease and kidney failure.
7. **Blood Sugar Regulation****: Preliminary studies indicate that cordyceps mushrooms may have a role in regulating blood sugar levels and improving insulin sensitivity, which could be

beneficial for individuals with diabetes or those at risk of developing diabetes.

8. Potential Anticancer Properties**: Some research suggests that cordyceps mushrooms may have anticancer properties and could inhibit the growth and spread of cancer cells. However, more studies are needed to confirm these effects.
9. Supporting Heart Health**: Cordyceps mushrooms may help in managing risk factors associated with heart disease, such as high cholesterol and high blood pressure, thereby promoting cardiovascular health.

It's important to note that while cordyceps mushrooms have shown promising health benefits in some studies, more research is needed to fully understand their mechanisms of action and effectiveness. Additionally, individual responses to cordyceps may vary, and it's advisable to consult with a healthcare professional before incorporating them into your routine, especially if you have any underlying health conditions or are taking medications.

**"UNLOCK THE VITALITY WITHIN YOUR
PET WITH THE TRANSFORMATIVE

- 50g Bag Powder Extract

2.

LION'S MANE - FUNCTIONAL MUSHROOM

Tonka, - Mom and dad were worried for their senior boy. He was showing signs of K-9 Dementia. He was getting so he couldn't use the stairs without help and was suffering physical and degenerative issues. Enter FurBabies Lion's Mane mushrooms, which not only strengthened Tonkas hips helping him but now he could use the stairs and walk around with confidence, all within a few days.

Lion's Mane is known as the "brain" mushroom as it has been tested and found to help with many cognitive issues, including dementia. It has also been shown to protect against stomach intestinal ulcers, may speed up recovery from nervous system injuries by stimulating the growth and repair of nerve cells, and may be able to relieve symptoms of depression and anxiety with its anti-inflammatory effects on the body. As well, it may have the potential to:

- 1. Enhanced Cognitive Function:** Lion's Mane contains compounds that may promote the growth of nerve cells and protect them from damage, potentially enhancing cognitive function, memory, and overall brain health.
- 2. Nerve Regeneration:** Research suggests that Lion's Mane mushrooms may stimulate nerve growth factor (NGF) production, which could aid in nerve regeneration and recovery from nerve-related injuries or conditions.
- 3. Improved Focus and Concentration:** By supporting brain health and neurotransmitter function, Lion's Mane mushrooms may help improve focus, concentration, and mental clarity.
- 4. Alleviation of Anxiety and Depression:** Some studies indicate that Lion's Mane mushrooms may have antidepressant and anxiolytic effects, potentially helping to alleviate symptoms of anxiety and depression.
- 5. Support for Digestive Health:** Lion's Mane contains polysaccharides and other compounds that may support gut health by promoting the growth of beneficial gut bacteria and protecting the digestive system from inflammation and damage.
- 6. Boosted Immune Function:** The immunomodulatory properties of Lion's Mane mushrooms may help enhance immune function, making the body more resilient to infections and illnesses.

7. **Reduced Inflammation:** Lion's Mane mushrooms contain antioxidants and anti-inflammatory compounds that may help reduce inflammation throughout the body, potentially lowering the risk of chronic diseases associated with inflammation.
8. **Support for Heart Health:** Preliminary research suggests that Lion's Mane mushrooms may have cardioprotective effects, including lowering levels of cholesterol and triglycerides, and reducing the risk of cardiovascular diseases.
9. **Blood Sugar Regulation:** Some studies indicate that Lion's Mane mushrooms may help regulate blood sugar levels and improve insulin sensitivity, which could be beneficial for individuals with diabetes or those at risk of developing diabetes.
10. **Potential Cancer-Fighting Properties:** While more research is needed, preliminary studies suggest that Lion's Mane mushrooms may have anticancer effects, including inhibiting the growth and spread of certain types of cancer cells.

These health benefits highlight the potential of Lion's Mane mushrooms as a valuable addition to a balanced and healthy lifestyle. However, it's important to note that individual responses may vary, and consulting with a healthcare professional before incorporating Lion's Mane supplements into your routine is advisable, especially if you have any underlying health conditions or are taking medications.

"NOURISH YOUR PET'S MIND WITH THE NATURAL BRILLIANCE OF LION'S MANE, IGNITING COGNITIVE CLARITY AND UNLEASHING THE FULL POTENTIAL OF THEIR MENTAL PROWESS."

3.

TURKEY TAIL - FUNCTIONAL MUSHROOM

Diesel - 12yr old Shepard mix spleen ruptured. Mom and Dad rushed him to the vets and they saved him but, sadly, were told he'll only have a few to a few months. Using FurBabies Turkey Tail drops and a good diet, Diesel had a great quality of life for 2 days short of 1 year!

Certainly! Turkey tail mushrooms, scientifically known as *Trametes versicolor*, offer a range of potential health benefits for pets. Here are ten of them:

1. **Immune System Support****: Turkey tail mushrooms contain polysaccharides and other compounds that may enhance the immune system, helping pets to better defend against infections and illnesses.
2. **Digestive Health****: The prebiotic properties of turkey tail mushrooms can support the growth of beneficial gut bacteria, promoting digestive health and regularity in pets.
3. **Anti-inflammatory Effects****: Turkey tail mushrooms contain antioxidants and anti-inflammatory compounds that may help reduce inflammation throughout the body, providing relief for pets with conditions such as arthritis or inflammatory bowel disease.
4. **Cancer Support****: Some studies suggest that turkey tail mushrooms possess anticancer properties and may help slow the growth of tumors in pets. They may also support pets undergoing cancer treatment by boosting their immune system and reducing treatment side effects.
5. **Improved Liver Function****: Turkey tail mushrooms contain compounds that support liver health and may help detoxify the liver, promoting overall well-being in pets.
6. **Respiratory Health****: Turkey tail mushrooms have been traditionally used to support respiratory health and may help pets with conditions such as asthma or bronchitis by reducing inflammation and improving lung function.
7. **Dental Health****: Chewing on turkey tail mushrooms can help promote dental health in pets by reducing plaque buildup and preventing gum disease.

8. Skin and Coat Health**: The antioxidant properties of turkey tail mushrooms may help improve skin and coat health in pets, reducing inflammation and supporting a shiny, lustrous coat.
9. Stress Reduction**: Turkey tail mushrooms contain compounds that may help reduce stress and anxiety in pets, promoting a sense of calm and well-being.
10. Longevity and Vitality**: By supporting overall health and well-being, turkey tail mushrooms can help pets live longer, healthier lives, full of vitality and energy.

As with any supplement or dietary addition, it's important to consult with a veterinarian before giving turkey tail mushrooms to your pet, especially if they have underlying health conditions or are taking medications.

"EMBRACE THE TRANSFORMATIVE HEALTH BENEFITS OF TURKEY TAIL MUSHROOMS, SUPPORTING YOUR PET'S WELLNESS JOURNEY WITH NATURE'S OWN POWERHOUSE OF VITALITY AND RESILIENCE."

- 50g Bag Powder Extract

4.

POWER BLEND 5+ FUNCTIONAL MUSHROOMS WITH ASHWAGANDHA

Oslo, once the runt of the litter and seemingly prone to frequent illnesses, faced a challenging start to life. His pet parents, burdened by mounting vet bills, felt helpless. However, everything changed when his dad introduced the Power Blend 5+ immunity boost into Oslo's routine. Suddenly, Oslo experienced a remarkable transformation. With newfound energy and focus, his appetite returned, and he eagerly engaged in playtime. Today, at a robust 65 pounds, Oslo, now two years old, thrives in health as a vibrant and lively husky.

Our **POWER BLEND 5+ Immunity** blend promotes overall well-being, contributing to whole-body harmony and potentially fortifying the immune system. The included mushrooms are recognized for their polysaccharides, known for immunomodulating properties, and antioxidants that may shield cells from oxidative damage caused by free radicals.

Key Benefits:

- Overall Wellness
- Immune Support
- Inflammation Reduction
- Enhanced Energy
- Gut and Heart Health
- Improved Cognition
- Anti-Anxiety Support

The carefully selected five mushrooms offer potential health advantages:

- Cordyceps: Lung and kidney tonification
- Lion's Mane: Immune support and cellular protection
- Chaga: Immune system enhancement
- Reishi: Adaptogenic and stress support
- Turkey Tail: Immunomodulation

Additionally, the inclusion of Ashwagandha Root provides immune support, aids in inflammation reduction, and offers pain relief. Notably, Ashwagandha Root has undergone testing and demonstrated significant benefits against arthritis.

POWER BLEND 5+ PRODUCT LINE

AVAILABLE IN

- 50mL Oral Drops

- 100g Bag Powder Extract

- 50g Bag Powder Extract

5.

RUFF SKIN TOPICAL SALVE

Ginger - Developed a strange oozing sore on her front leg. The vet diagnosed it as being a hot spot, he prescribed medication after medication, for over 4 months, but nothing seemed to help and it was rapidly getting worse. Enter FurBabies Ruff Skin salve. After 2 weeks of daily use, the sore not only stopped growing, it's almost completely healed.

RUFF SKIN FOR:

Hot Spot, wounds, abrasions, acne
100% all-natural organic salve

Our medicated salve, kills the bad bacteria that causes infections while helping to heal the wound. Non-toxic made with calendula helps new tissue grow and decreases swelling.

Hot spots are essentially an immune-mediated response of the skin. They appear as red, moist, irritated, sometimes oozy skin lesions. Hot spots also tend to appear suddenly, with no warning. If you see one on your dog, it's important to start treating it right away.

Ingredients: Bees wax, sun flower oil, coconut oil, calendula oil, chamomile oil, cone flower, myrcene, holy basil, maca, beta-caryophyllene, alpha-pinene, camellia sinensis, frankincense, hemp seed oil, α -tocopherol, hypericum (St. John's Wart), rosemary oil/extract.

AVAILABLE IN

- 60mL Jar
- 100ml Spray

EASY LINE

CONDITION BASED FOR PAIN & ANXIETY

6.

FELINE EASY CALM

Socks, a 15-month-old rescue cat who used to be afraid of her own shadow. Loud noises, the vacuum - practically everything made her anxious, often causing her to hide for days. Upon recommendation from the rescue he adopted parent tried FurBabies Feline Easy Calm. Initially hesitant to take the drops, Socks quickly warmed up to them and eagerly licked them off the dropper the next time around. The results have been nothing short of amazing - she's become more social with the family, no longer fleeing from loud noises or the vacuum. Now, she happily sleeps with their daughter and delights in playtime.

Specifically formulated for Feline Anxiety. A combination plant adaptogens that may help anxiety felines and promote focus & calmness.

7.

K-9 EASY CALM

Daisy, one-year-old Great Dane was terrified of loud noises like thunderstorms or fireworks. Whenever they occurred, she would panic and attempt to hide under the bed - quite a feat for a 150-pound dog. Her anxiety levels were escalating, making training her a real challenge. Thankfully, her trainer recommended Easy Calm for dogs, noting its effectiveness in calming hyperactive dogs and enhancing focus during training sessions. Intrigued by its all-natural composition, Daisy's pet parents decided to give it a try. Three weeks later, Daisy's transformation was remarkable. During our daughter's recent tenth birthday party, with a dozen energetic ten-year-old girls running and screaming, Daisy remained calm and composed, no longer trembling or seeking refuge. It's like we have a whole new dog!

Specifically formulated for K-9 Anxiety. A combination of Mushrooms and adaptogens that promote focus and calming in dogs.

Helps Pets with:

- To promote focus
- Rescued pets coming from terrible situations
- Loud noises like thunderstorms or fireworks
- Changes, such as a new pet or person in the home
- Travel: car, plane etc.
- With PTSD in cats
- Trips to the vet
- Stressful routine changes

Ingredients:

MCT Oil, Lion's Mane, Reishi, Chaga, Spirulina, Ashwagandha Root, Holy Basil, Hemp seed oil, Beta-Caryophyllene (West African Black Pepper), Camelia Sinensis, Coneflower (Echinacea), Frankincense, Maca, Myrcene (from Mangos) Terpene, Alpha Pinene Terpene,

AVAILABLE IN

- 50mL bottles
- Feline or K-9

8.

FELINE EASY JOINTS

Wallace, a beloved 6-year-old cat, who was grappling with arthritis. Upon the vet's recommendation, the parents decided to try FurBabies Easy Joints. The results were astounding - within just two short weeks, Wallace underwent a remarkable transformation. Suddenly, eager to play and climb again (though they are not entirely sure if that's a good thing!).

Given Wallace's fussy nature, they anticipated a struggle to administer the supplement. However, to their surprise, he now eagerly awaits the sight of the bottle, willingly licking the contents straight off the dropper.

Specifically formulated for feline Pain & Arthritis. A combination of Mushrooms and adaptogens that target pain and arthritis in cats.

9.

K-9 EASY JOINTS

Storm, a resilient 12-year-old American Bulldog mix. From an early age, had battled hip dysplasia. At 10, he faced another hurdle - a Mass Gel Tumour on his left rear hip. Now, two years later, he continues to thrive, however he began to struggle with mobility, especially climbing stairs or walking/running.

His pet parents found K-9 EASY JOINTS - a game-changer for Storm. Since starting him on this supplement, the difference has been astounding. Storm moves with greater ease, and we've even noticed small bursts of play and jogging - a sight his pet parents thought would never see again.

Specifically formulated for
K-9 Pain & Arthritis.
A combination of
Mushrooms and
adaptogens that target
pain and arthritis in dogs.

Helps Pets with:

- Pain associated with arthritis
- Inflammation
- Alleviate discomfort associated
- Normal daily activity
- Maintain flexibility and normal
- comfortable range of motion
- Joints, cartilage, ligaments
- Plant based, natural ingredients
- Appropriate for dogs or cats of all age

Ingredients:

MCT Oil, Cordyceps, Lion's Mane, Reishi, Chaga, Turkey Tail, Spirulina, Ashwagandha Root, Holy Basil, Hemp seed oil, Turmeric, Beta-Caryophyllene (West African Black Pepper), Camelia Sinensis, Coneflower(Echinacea), Frankincense, Maca, Myrcene (from Mangos) Terpene.

AVAILABLE IN

- 50mL bottles

10.

DENTAL CARE POWDER

Chip has always had trouble with his teeth, (what Pug doesn't) and finding something that actually worked—and that he liked—was a challenge.

Since we started using the FurBabies Dental Care powder, everything has changed. It's so easy to sprinkle on his food, Chip loves the taste, and his breath is finally fresh again! We're honestly amazed at the difference.

Thank you, FurBabies, for making something that really works for our little skateboarding superstar!"

11.

DENTAL CARE POWDER

We rescued Patch when he was about 4 months old—he had been living on the streets. After a checkup, we found he was healthy, just a little malnourished... but his breath was terrible! The dentist recommended toothpaste, but nothing worked.

This year, we discovered **FurBabies Dental Care**, and it's amazing! No more bad breath, and Patch loves the taste. We just mix it with his food—thank you, FurBabies!

DENTAL CARE POWDER:

- Helps reduce plaque and tartar naturally
- Freshens breath by targeting odour-causing bacteria
- Supports healthy gums and strong teeth

FurBabies Pet Dental Care Powder keeps teeth clean, breath fresh, and gums healthy—no brushing required! Made with **Icelandic brown seaweed** and **Turkey Tail mushroom**, it reduces plaque, fights odor, and supports immunity. Just sprinkle on your dog or cat's food daily for a **stress-free, mess-free** boost, with **prebiotics and probiotics** for a balanced, healthy gut.

AVAILABLE IN

- 100g Jar

PLANT BASED GOODNESS 101

WHAT ARE - ADAPTOGENS?

Adaptogens are a class of plants, herbs and mushrooms that help the body adapt to stressors and maintain homeostasis. They have been used for centuries in traditional medicine systems such as Ayurveda and Traditional Chinese Medicine.

Adaptogens work by modulating the body's stress response, providing energy, anti-inflammatory, Immune system boosting, supporting the adrenal glands, and promoting overall balance in the body. They are known for their ability to increase resilience to stress, improve energy levels, enhance mental clarity, and promote overall well-being. Some well-known adaptogens include ashwagandha, rhodiola, holy basil, ginseng, and cordyceps mushrooms.

Some of the adaptogens FurBabies utilizes are:

Ashwagandha Root: is an adaptogen, meaning it will help regulate your pup's nervous system. Because of its calming qualities, Ashwagandha can soothe your cat if it suffers from: Separation anxiety. Social anxiety.

Beta-Caryophyllene (West African Black Pepper) – interacts in the body with the endocannabinoid receptor (CB2) reducing pain and inflammation. Research has also shown caryophyllene could significantly reduce anxiety and depression.

Camelia Sinensis: diminishes stress, worry and anxiety, allowing the brain to focus and concentrate better. Has been associated with altered levels of 5-HT, which in turn may help in coping with stress.

Coneflower (Echinacea): –has hormonal, antiviral, and antioxidant effects.

Frankincense: is known to lessen anxiety by activating the limbic system to overcome your racing thoughts. It also acts as a sedative to relax the body and mind.

Holy Basil: has been shown to have antidepressant and anti-anxiety properties similar to antidepressant drugs. Studies have

PLANT BASED GOODNESS 101

Maca: is used holistically to help improve your pet's resistance to metabolic, oxidative, physiological, biochemical, physical, emotional, environmental, immune, central nervous, and neurological stress and dysfunction. Rich in vitamin B vitamins, C, and E. It provides plenty of calcium, zinc, iron, magnesium, phosphorous and amino acids.

Rhodiola rosea – provides important immune support during stressful periods. Improves physical stamina. Helps regulate blood sugar and cardiac function. Has been confirmed to possess protective effects of inflammatory injury for many diseases, including cardiovascular diseases, neurodegenerative diseases, diabetes, sepsis, and cancer.

Reishi: Reishi mushroom for anxiety has the ability to manage stress levels by nourishing and calming the central nervous system and promoting relaxation. During Reishi mushroom's long history, the people of Asia regularly used it for its calmativie effects and ability to strengthen the nerves.

Chaga: Improve energy levels and brain function, inflammation, immune system

"All of our ingredients are derived from plants, ensuring they are non-GMO and organic whenever feasible."

MUSHROOMS 101

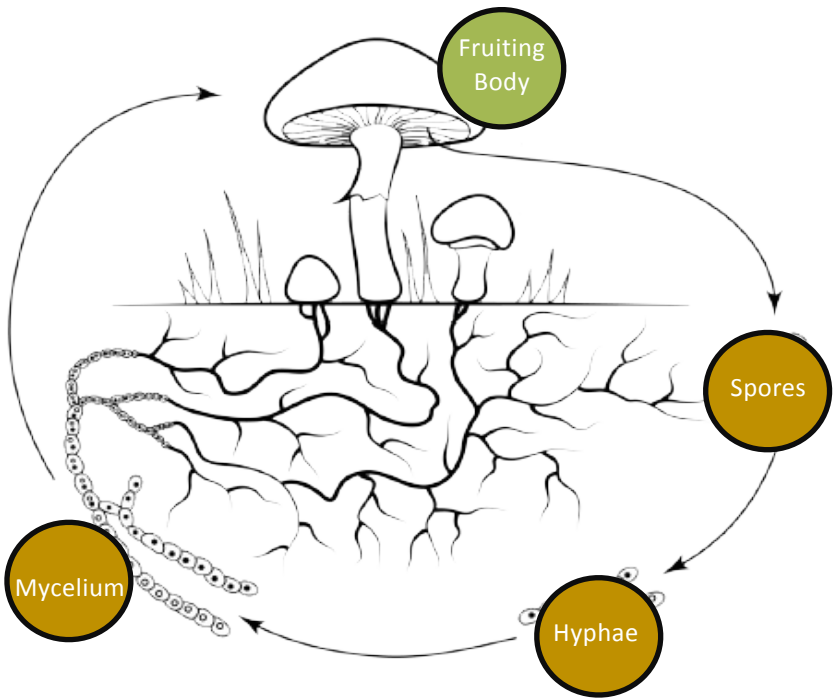

WHAT ARE - FUNCTIONAL MUSHROOMS?

Functional Mushrooms are fungi cultivated specifically for their health benefits, surpassing their traditional use as mere food. They are consumed for their potential to offer a range of advantages beyond basic nutrition.

Within the vast realm of mushrooms, comprising over 50,000 species, not all provide health benefits. Through extensive research, we've identified the top functional mushrooms tailored for your pets. These functional mushrooms boast prebiotic properties aiding digestion, along with remarkable immunity-boosting capabilities.

- Functional mushrooms have medicinal properties
- all have antibacterial, anti-fungal, and antiviral properties
- FurBabies mushroom extracts are lab tested to verify content and therapeutic compounds
- Our mushrooms are grown on native substrates and always extracted from the fruiting body only.

MUSHROOMS 101

MUSHROOMS 101

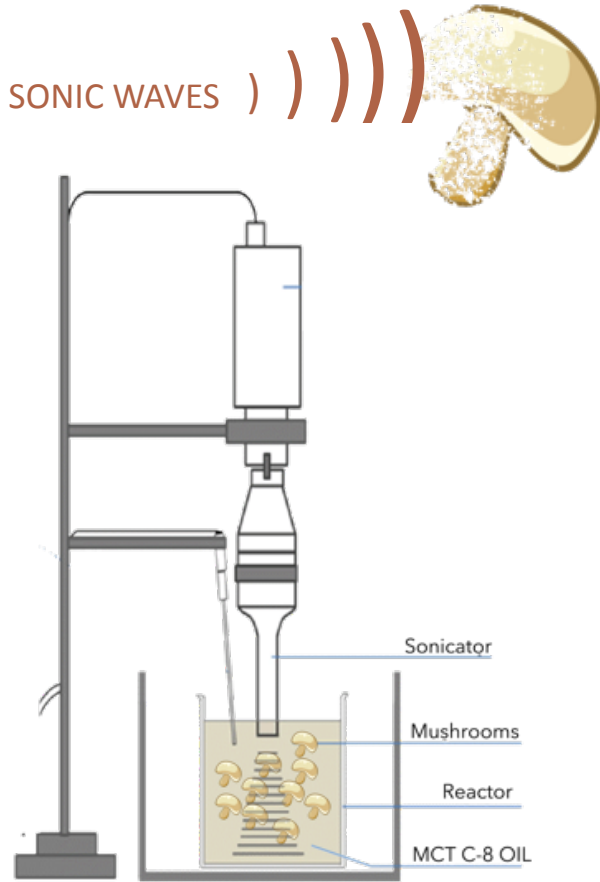

PROPRIETARY EXTRACTION METHOD

At FurBabies, we collaborate with mycologists and scientists from around the world to deliver the highest quality product available. Our extraction method stands apart from others on the market. While most utilize hot water and alcohol extraction, which can introduce extra sugar and starch into the final product, we employ sound waves in our extraction process.

Sound waves make a HUGE difference in our finished product:

- Up to 18X stronger than other alcohol extracted products
- Smaller molecules makes the drops more bioavailable to the body
- The entire mushroom is included, even the skin(chitin).
- Alcohol and or traditional methods can't break the chitin so many beneficial compounds are left behind
- 100% alcohol free
- Higher polysaccharide & beta-glucan content
- Our carrier oil is C8 MCT coconut oil the carries medicinal benefits as well.

MUSHROOMS 101

*Our process breaks down the Chitin, extracting more medicine.

PLANT BASED GOODNESS 101

WHAT ARE - TERPENES?

"A dog is the only thing on earth that loves you more than he loves himself." - Josh Billings

Terpenes are a large and diverse class of organic compounds produced by various plants. They are responsible for the aroma

"Time spent with cats is never wasted." - Sigmund Freud

and flavour of these plants and play a role in their therapeutic effects and are believed to have various health benefits. anti-inflammatory, analgesic, and anxiolytic properties. Some common terpenes found in plants include limonene (citrus), myrcene (mangos), pinene (pine tree), and linalool.(Lavender)

Myrcene (from Mangos) Terpene: plant possesses a sedative effect and has been researched to show its effectiveness for pets suffering with anxiety, by offer a calming effect.

Alpha Pinene Terpene: Pinene can help to offset anxiety, elevated memory impairment cognitive health.

OTHER INGREDIENTS

Spirulina: can help increase levels of serotonin which can help with depression, anxiety, and other mood disorders. This blue-green algae FurBabies uses works great as an antioxidant. It is well known that oxidative damage can be very harmful to your pet.

Turmeric: including arthritis, inflammation, digestive disorders, respiratory infections, allergies, liver disease, depression,

Hemp seed oil: cold press oil - good source of omega 3,6,9

MCT Oil: Coat and skin health.

“Spirulina serves as a non-animal protein source that cats can easily incorporate into their systems.”

Conclusion

As you close this book, we hope you carry with you more than information about products — we hope you carry a renewed appreciation for the extraordinary bond we share with our animals.

Every story in these pages reflects trust, dedication, and the simple desire to give our companions the healthiest, happiest lives possible. From playful beginnings to the slower, more tender seasons of aging, our pets walk beside us with loyalty and love. Supporting their comfort and vitality is one small way we honour that devotion.

FURBABIES was created with that purpose in mind — to offer thoughtful, natural wellness solutions rooted in quality, care, and integrity. But the true heart of this journey has always been you — the pet parents who seek better, ask questions, and choose consciously.

Thank you for being part of a community that believes our animals deserve nothing less than our very best.

Here's to healthier days, brighter moments, and many more years together.
