Vol 13 - 02/15/2026

ABOUT US

Condition based functional products

FURBABIES products are functional products specifically formulated for pain, anxiety and wellness for your pet, including horses. Our products are infused with a proprietary blend of cannabimimetics and adaptogens found in plants 100% all natural. Canadian made with non-GMO human grade food ingredients.

Our products are created to help maintain health and alleviate aches and pains from injury or old age. Changes should be noticed within 4 days of administering.

We hold our products to the same quality standards as the food you serve to your human family. **FURBABIES** is committed to researching and developing only the finest pet products using all natural ingredients. We source organic wherever we can and take pride in providing your pet with the very best possible product available.

How does it work?

Plants contain a number of different chemicals (terpenes) medicines (cannabinoids), including CBD, phytocannabinoids, terpenoids and flavonoids. All mammals have specific cannabinoid receptor sites. These sites are primarily in the brain and central nervous system, and in peripheral organs, especially immune cells. They make up what's called the endocannabinoid system. (See pg 6)

Studies show that many cannabinoids have anti-inflammatory effects, and can help with pain, tumours, seizures, muscle spasms, skin conditions, appetite stimulation, aggression, anxiety and neurological disorders.

Adaptogens are non-toxic plants that help the body resist stressors of all kinds, whether physical, chemical or biological. These herbs and roots have been used for centuries in Chinese and Ayurvedic healing traditions for both humans and animals.

Cannabimimetic: (plural cannabimimetics). Any substance with similar pharmacological effects to those of cannabis (cannabinoids). "Cannabimimetic" compounds which are being discovered as to having similar pharmacological effects to those found in cannabis (cannabinoids) (CBD, CBG, CBN, CBC); applied to various cannabinoid receptor types including the most commonly known cannabinoid receptors 1 and 2, along with the less known TRPV family and GPR55.

Our proprietary formulation of **Cannabimimetics & Adaptogens** help with both chronic and acute disease. Among chronic conditions, it can help with arthritis, compromised immune systems, stress responses, aggression and digestive issues. There are also studies under way into cannabinoid (CBD's) effects on Type 1 diabetes, organ diseases and cancer. Veterinarians are also finding hemp terpenes can be useful in treating acute ailments like sprains and strains, torn ligaments, bone breaks and even during post-operative care to reduce swelling, pain and stiffness. If you're dog's taking conventional drugs for any of these conditions, our product may make it possible to use lower doses of the drugs to achieve therapeutic effects.

Does It Work Fast?

As with any herbal medicine, for most ailments you may not see an immediate effect. You'll need to be patient. Your dog may feel some pain relief in a few hours but other symptoms like inflammation may take a few days to show improvement.

Safety

First of all, we use hemp that has no THC. Cannabimimetics & hemp won't make your pet high. The most common side effect is that your fur baby may get a little drowsy – about the same as if you gave them a Benadryl.

OUR PRODUCTS

Oral Drops

For pain, anxiety and overall pet wellness

The **FURBABIES** oral drops with Cannabimimetics.

Our Pet oral drops are 100% all natural plant based medicine including the vegan flavouring in the "Bacon" flavour. Made from the whole plant/full spectrum. Human grade, non-GMO, contaminant-free, Co2 extracted, 3rd party tested.

Effective relief from all forms of general inflammatory and neuropathic pain including: Allergy Skin & coat health, Arthritis, Pain relief, Cognitive function, Promotes focus, Seizures, Stress, Anxiety, Digestive issues. Our drops come in Bacon & Natural Flavour, in 100mg/150mg/300mg/600mg in 30ml bottles & 1800mg strength in 60ml bottles.

Dog Treats

Plant Based Functional

The **FURBABIES** functional pet treats with Cannabimimetics.

Our all natural pet treats are plant based full of protein and functional ingredients. Made from the whole plant/full spectrum. Human grade, non-GMO, contaminant-free, 3rd party tested. In three (3) delicious flavours - Angus Beef, Chicken, & Wild Boar.

Effective relief from all forms of general inflammatory and neuropathic pain including: Allergy Skin & coat health, Arthritis, Pain relief, Cognitive function, Promotes focus, Seizures, Stress, Anxiety, Digestive issues. Each treat has 3.5mg of "Cannabimimetics" in our 200gram bag for a total of 140mg of Cannabimimetics.

ANGUS BEEF FLAVOUR

WILD BOAR FLAVOUR

CHICKEN FLAVOUR

RUFF SKIN

Topical healing - Salve or Spray

FURBABIES all natural remedy for HOT SPOTS, abrasions, and wounds. This all natural salve, kills the bad bacteria that causes infections while helping to heal the wound. Non-toxic made with calendula help new tissue grow in wounds and decrease swelling. Hot Spot Salve or our new Spray - Specifically formulated to treat hot spots, which are essentially an immune mediated response of the skin. 100% all natural (30mL tin).
Ingredients: Hemp Oil, Coconut Oil, Chamomile Oil, Calendula Oil, Beeswax, Cannabimimetics, Hypericum (St. John's Wort), Vitamin E, Rosemary Essential Oil, Rosemary Extract.

Dental Care

POWDER

Natural Oral Health Support for Dogs & Cats

Give your furry friend a healthier mouth the natural way. FurBabies Pet Dental Care Powder is a veterinarian-formulated blend of powerful, plant-based ingredients designed to support clean teeth, fresh breath, and healthy gums—without the need for brushing.

Made with *Ascophyllum nodosum* (Icelandic brown seaweed) and Turkey Tail mushroom, this daily dental powder works from the inside out to reduce plaque buildup, fight bad breath, and support your pet's immune system. Just sprinkle it on your dog or cat's food once a day—no stress, no mess.

Key Benefits:

- Helps reduce plaque and tartar naturally
- Freshens breath by targeting odour-causing bacteria
- Supports healthy gums and strong teeth
- Immune-boosting support from Turkey Tail mushroom
- Easy-to-use daily supplement—no brushing required
- 100% natural, vegan, and pet-safe
- Suitable for dogs and cats of all ages and sizes

Better breath. Cleaner teeth. Less Mess. Happier pets.

Feline Easy Joints

Pain, Joint Pain and

The **FURBABIES** oral drops Feline

FELINE EASY JOINTS - ORAL DROPS - Specifically formulated for Feline Pain & Arthritis. A combination of CBM and adaptogens that target pain and arthritis in felines.

- Natural cannabimimetic and adaptogens
- 50mL bottle
- Controlled dosing with gradient droppers
- Ideal for cats, and other small animals.
- Effective relief from all forms of general inflammatory and neuropathic pain

Feline Easy Calm

Anxiety

The **FURBABIES** oral drops Feline

FELINE EASY CALM - ORAL DROPS - Specifically formulated for Feline anxiety. A combination of CBM and adaptogens that target anxiety and promote focus, and calming effect.

- Natural cannabimimetic and adaptogens
- 50mL bottle
- Controlled dosing with gradient droppers
- Ideal for cats, and other small animals.

K-9 Easy Joints

Pain, Joint Pain and Pain caused by Arthritis

The **FURBABIES** oral drops K-9

K-9 EASY JOINTS - ORAL DROPS - Specifically formulated for canine Pain & Arthritis. A combination of CBM and adaptogens that target pain and arthritis in dogs.

- Natural cannabimimetic and adaptogens
- 50mL bottle
- Controlled dosing with gradient droppers
- Ideal for dogs, of all ages and sizes.
- Effective relief from all forms of general inflammatory and neuropathic pain

K-9 Easy Calm

Anxiety

The **FURBABIES** oral drops K-9

K-9 EASY CALM - ORAL DROPS - Specifically formulated for canine anxiety. A combination of CBM and adaptogens that target anxiety and promote focus, and calming effect.

- Natural cannabimimetic and adaptogens
- 50mL bottle
- Controlled dosing with gradient droppers
- Ideal for dogs of all ages and sizes.
-

Equine-Easy Care

Care - Pain & Anxiety

The **FURBABIES** oral drops with Cannabimimetics.

EQUINE CARE - Specially formulated for horses.

Easy Calm: Effective relief from Anxiety promotes: Cognitive function, Promotes focus, Seizures, Stress, Anxiety, Natural Flavour, Natural Flavour- Peppermint 50ml Bottle.

Easy Joints Effective relief from all forms of general inflammatory and neuropathic pain including: Allergy Skin & coat health, Arthritis, Pain relief, Digestive issues. Natural Flavour- Peppermint 50ml Bottle.

Medicinal Mushrooms

Functional Mushroom Extract for Your Fur Baby

All FurBabies mushroom extracts are lab tested to verify beta-glucan content and therapeutic compounds. Our mushrooms are grown on native substrates and always extracted from the fruiting body. If you're wanting the powerful benefits of performance mushrooms, choose organic extracts from the fruiting body to maximize both therapeutic compounds and bio-availability. The mushroom powder is 100% fruiting body, uses no additives, and is grown both outdoors and in a controlled environment, offering nothing but the best!

TURKEY TAIL MUSHROOMS - RESTORE Immunity Boost | Gut Health

Stress, antiviral, antiallergic, promotes urinary health, lower cholesterol levels, regulate blood pressure, beneficial for thyroid issues, increases heart health, antioxidant.

CORDYCEPS MUSHROOMS - Vitality - Respiratory, Kidneys

Kidney disease, purifies the kidneys, detoxifies the blood by, balancing blood sugar levels. respiratory issues, coughs, (including kennel cough and bronchitis), anxiety, reduce cholesterol, boost their immune system, helps give your pet energy and strength.

LION'S MANE MUSHROOMS - Rejuvenate Heart Health / Gut / cognitive

Improves heart health, repairs leaky gut/gastrointestinal, tract issues, protect the gastrointestinal tract, cognitive functions (dementia), with neurological issues, help eyesight, helps with Degenerative Myelopathy, increases circulation, anti-inflammatory, heals ulcers, improves mood, calms anxiety,

POWER BLEND 5+ - With Ashwagandha Root-Immunity boost

Powder form 50g & 100g bag sizes Get the combined effect of the worlds top 5 mushrooms. This blend supports whole-body harmony and immune system strength. Overall Wellness | Immune Support | Inflammation

*POWDER MAY DIFFER IN COLOUR

*POWDER MAY DIFFER IN COLOUR

Mushroom Oral Drops

Proprietary Extraction method from the full fruiting body only

SAFE AND HEALTHY FUNCTIONAL MUSHROOMS FOR PETS

Cordyceps, Lion's Mane, Turkey Tail and Power Blend 5+. For Immunity, Inflammation, Heart & Gut Health, Energy and Focus.

EDUCATION

Pet Seizures & Natural Remedies

Seizures aren't just for humans – unfortunately, many of our beloved pets suffer from status epilepticus (epilepsy), too. Canine seizures are one of the “silent epidemics” that affect dogs across the world. Seizures aren't spoken of as often as hip dysplasia or fleas & ticks, but that doesn't mean it can't happen to your dog. Studies report that Idiopathic epilepsy (the single most common canine seizure disorder) occurs in 0.5 to 5.7 percent of all dogs. Whether your dog has already experienced an epileptic seizure, you'd like to help prevent them from happening in the first place, or simply be prepared in how to treat dog seizures, it helps to learn as much as you can about canine epilepsy treatment.

Types of Seizures or Epilepsy That Can Affect Dogs

There are several different kinds of seizures and epilepsy that can cause your pet problems:

- “Epilepsy” is a term used to describe recurrent or reoccurring seizures that originate from the brain.
- “Idiopathic epilepsy” describes a form of epilepsy that does not result in brain lesions or damage to the brain.
- “Symptomatic epilepsy” is used to describe primary epilepsy resulting in structural lesions or damage to the brain's structure.
- “Probably symptomatic epilepsy” is a phrase used in cases of suspected symptomatic epilepsy, where a patient has reoccurring seizures, but where no lesions or brain damage is apparent.
- “Cluster seizure” describes any situation where an animal has more than one seizure in consecutive 24-hour periods.
- “Status epilepticus” involves constant seizures, or activity involving brief periods where there is inactivity, but not complete relief from seizure activity.

Unfortunately, the number of seizures your dog has are linked to neuron damage in his or her brain. This in turn means your pet is more likely to experience seizures again. For research purposes, most experts classify all seizures in one of three ways:

1. Generalized seizures impact most of the brain and include both sides.
2. Focal seizures impact only a smaller, localized portion of the brain.
3. Focal seizures with secondary generalization are seizures that start out in one smaller place but then eventually lead to the rest of the brain seizing.

Just like humans, dogs often get warning signs when a seizure is coming. The warning comes in the form of an aura, not unlike the kind of aura humans with migraines and other neurological disturbances experience. Your dog's aura will typically make him or her feel and act stressed, scared, or worried. Your pet may also experience muscle and limb contractions, visual disturbances, and even loss of bowel and bladder control. A dog with seizures can also enter into a kind of altered mental status before a seizure hits, so be on the lookout for this and other neurological symptoms.

Pet Seizures & Natural Remedies cont...

Natural Remedies for Seizures in Dogs – Dog Seizure Treatment that Works

As canine epilepsy research continues to mount, it's becoming increasingly clear that animal nutrition – similar to human dietary habits – can play a vital role in disease prevention and longevity. The nutritional profile of dog food and snacks should ideally contain beneficial phytochemicals and [antioxidants, which serve as neuroprotectants](#), reduce inflammation, ward off disease, and optimize nutrient absorption.

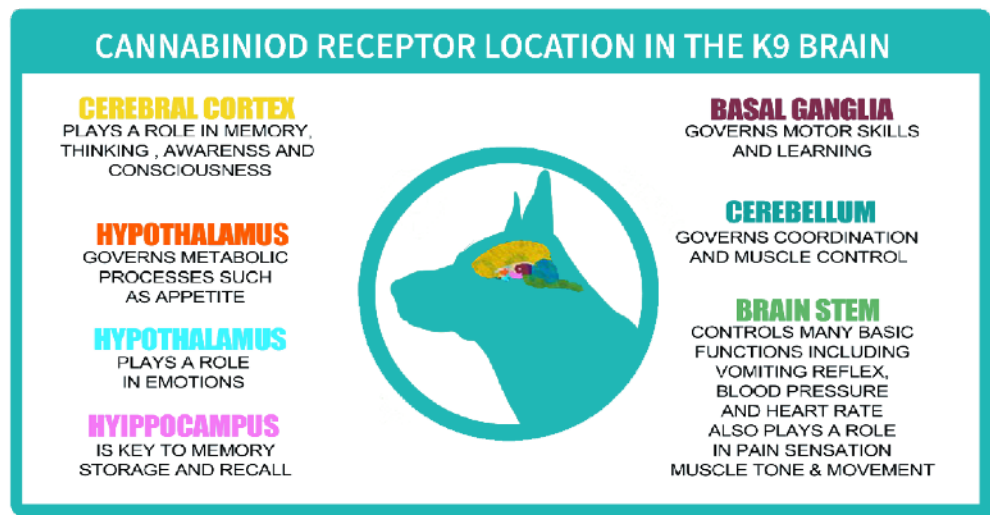

Aside from the anti-inflammatory effects, canine dietary habits should also strive to strengthen your dog's overall immune system function. A robust immunity response is vital in preventing relatively small issues from becoming serious health issues. Researchers are currently working on studies that examine the relationship between immune system health and the onset of seizures.

Hemp terpenes (HT) from hemp including CBD (HT's), reduces pain, inflammation, and anxiety as well as seizure activity...Decades of research indicate that HT's yields notable anticonvulsant effects with minimal neurotoxicity. It reliably reduces neuronal activity and seizure severity... HT's affects several endogenous cannabinoid pathways simultaneously, demonstrating a multiplicity of neuropharmacologic mechanisms of action. It works additively and at times synergistically with other anti-epileptic drugs; this allows clinicians to more readily introduce HT's into a seizure patient's drug regimen without reducing the effectiveness of pharmaceuticals already "on board."

As it turns out, the nervous, lymphatic and possibly other systems within the body already house cannabinoid receptors, making them already prepared to respond to both phyto- and endo-cannabinoids. regulates neuronal excitability. When it falters, an "endocannabinoid deficiency syndrome" may result, associated not only with seizures but also with the onset of fibromyalgia, irritable bowel syndrome, migraine and other maladaptive states...

In fact, many integrative approaches for epilepsy also affect endocannabinoid states, including acupuncture along with certain nutritional supplements, herbal medicines, dietary changes, and, of course, Hemp Terpenes (HT's).

The Endocannabinoid System

Less than 30 years ago, scientists stumbled upon a unique and hitherto unknown molecular signalling system in the brain, the central nervous system, and throughout the body that is involved in regulating a broad range of biological functions. Scientists called it “the endocannabinoid system,” after the plant that led to its detection.

The name suggests that the plant came first, but in fact, this ancient, internal signal system started evolving over 600 million years ago (long before hemp appeared) when the most complex life form was sponges. Endocannabinoids and their receptors are present in every animal except insects. Given its long evolutionary history, scientists surmise that the endocannabinoid system must serve an important and basic function in animal physiology.

The endocannabinoid system (ECS) is involved in a variety of physiological processes including appetite, pain-sensation, nausea, mood, memory, and inflammation.

Functional Mushrooms for your pet?

Mushrooms are a superfood and not only offer great nutritional value to your pet, but can also help with a number of issues. Most are known for antimicrobial, antiviral, antiallergic, and anti-inflammatory abilities.

Turkey Tail - known for its immune boosting benefits and cellular health properties, and may be a useful defence with cancer. A study showed it can help with hemangiosarcoma (spleen cancer)

Lion's Mane - promote digestive health and protect the gastrointestinal tract. They also stimulate nerve growth and help regenerate damaged nerves. Lion's Mane mushrooms are especially beneficial for senior pets. They are known to boost the brain and nervous system and improve cognitive function

Cordyceps - supports the liver, purifies the kidneys, detoxifies the blood, and promotes a healthy immune system. Cordyceps mushrooms are known to reduce fatigue and enhance endurance. They are also used in the treatment of a wide variety of health conditions, including leaky gut syndrome, asthma and respiratory diseases, and chronic liver disorders

- **Power Blend +5** - blend of 5 mushrooms that can help maintain your pets good health.
- **Cordyceps**: Tonifies lungs and kidneys
- **Lion's Mane**: Immune support, protective to cells
- **Shiitake**: Boosts the immune system
- **Reishi**: Adaptogenic/stress support
- **Turkey Tail**: Immunomodulator
- **Ashwagandha Root**: Immune support, inflammation, pain relief

Bonus: All FurBabies products are human grade and you can enjoy the benefits of mushrooms alongside your pet
